## Community Consultation Program

## About Us

The Community Consultation Program (CCP), part of the Division of Developmental and Behavioral Pediatrics, provides evidence-based technical assistance and training to school teams and agencies serving children and adults with educational and/or behavioral needs. We aim to build capacity and promote inclusive practices in community and educational settings, as well as increase positive social, behavioral, and academic skills of individuals served.

## Community Consultation Program

Part of the Division of Developmental and Behavioral Pediatrics

We tailor our trainings to meet your specific needs, ensuring relevant and effective support for your team.
