

My doctor has moved to a new building. When I go to the doctor, this is what the new building will look like. I will drive here with my family when I have an appointment.

When I walk into the building, I will go to the third floor using the elevators or the stairs.

When I get to the third floor, I will walk down the hallway to the check-in desk.

After I check in with my parents, we will walk into a big room where I will wait to see the doctor.

A tech will call my name. That means it is time to go. First, we will go to the vitals station where they will take my vital signs.

After I get my vitals, we will walk down the hallway to an exam room to meet the doctor and have an exam.

After my exam, we will walk down the hallway to the check-out desk.

Then it will be time to leave. I can take the elevators or go down the stairs.

I did a great job today!
