

# What if I'm worried about my student's development?

## Step 1

Discuss your concerns with the student's parents, and suggest they talk with the child's PCP.

## Step 2

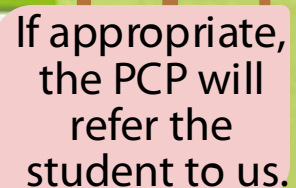

Request an evaluation for school-based services to your district's committee on special education.

## Step 3

The parents should review the evaluation results with their child's PCP.

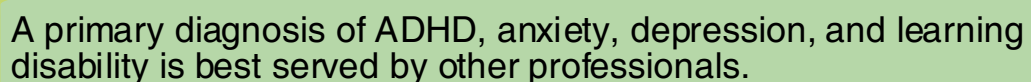

If appropriate, the PCP will refer the student to us.

## Step 4

The student's parents can begin our intake process!

A primary diagnosis of ADHD, anxiety, depression, and learning disability is best served by other professionals.

Please consult with your primary care provider (PCP).
