

Tracheostomy Equipment & Supply List for Home

Your vendor will provide you with the supplies you'll need at home. Below is a list of possible supplies that you will get at home. Your child's insurance will determine the quantity and types of supplies you get.

A few items that are no longer covered by insurance but you will need at home include:

- Hydrogen peroxide
- Cotton-tip swabs (non-sterile) like Q-tips®
- Water-based lubricant
- Unsterile procedure gloves.

You can buy these supplies from medical supply companies, drug stores, or most large grocery stores.

The Care Coordinator can help you fill out the number of items you will get each month at home. This will be done with the help of your child's equipment vendor.
