Research Studies

Research is a way to discover new information or to answer questions about how to live healthier lives, how to better treat conditions or diseases, or how we learn, develop, behave and function to help society. Some research is also referred to as 'clinical trials' or 'health research.' These studies test drugs, medical devices, vaccines or other treatments that may affect a person's health or well-being.

Every study is a partnership between the people in our community who take part and the researchers at UR Medicine. There are several reasons why people choose to take part in research, most take part to help themselves or others. It's important to know that you may not benefit from taking part in research. In fact, with a lot of research, you will not receive any benefit.

MyChart now offers the opportunity to be notified about research studies you may be eligible for. If you are interested in receiving these messages, click "OK to Contact" and then you can create a profile to select areas of research you are interested in. **If you do not want to receive these messages, you must indicate below by clicking "Do Not Contact." If you do not make a selection, we will assume that you are willing to be contacted.** Your choice will not affect your use of MyChart, communication from your clinical team(s) or your healthcare at UR Medicine.

If you have questions about taking part in research, email ResearchHelp@urmc.rochester.edu or [click here to learn more](#) about other research opportunities, which includes a list of studies enrolling right now, and you can sign up to be contacted about research studies outside of MyChart by either email, phone, or letters. You can also learn more about research here: [Participating in Research at the UR](#).

Participation Preferences

Your Studies

You are not enrolled in any research studies or your research studies are not visible in MyChart.

- **Available Studies** - New study opportunities
- **Active Studies** - Studies in which you are currently enrolled. Note, this list may not include all research studies you participate in, but only those offered to you through MyChart. You may also be enrolled in research studies which were offered to you through other modes of communication such as email, phone or letters.

[BACK TO THE HOME PAGE](#)

Participation Preferences

Your preferences will help us let you know about research opportunities that might interest you.

- **OK to Contact** - You are willing to be notified through MyChart about a research study that might be a fit for you.
- **Do Not Contact** - You are not willing to be notified through MyChart about a research study. You may still be contacted directly through your provider about a study either through MyChart or through other types of communication such as letters and phone calls.

If no choice is made: We will assume that you are willing to be contacted for research studies through MyChart. You can always change your contact preference in the future. Visit the Research Studies page.

Related Links

[Communication Preferences](#)

How's it work?

- Research teams get recruitment consultation with CTSI
- Identify subjects (>18) who are eligible
- Get MyChart message IRB approved (MyChart Request Form)- must include standard language
- eRecord team activates MyChart for Recruitment in EPIC
- Study Coordinator sends IRB approved message through MyChart
- Patient indicates interested or not interested

Caveats

- Only adult studies
- No studies of a sensitive nature
- Recruitment plan with multiple channels
- Study must be required to be in OnCore
- Cannot send messages in bulk: one at a time
- Patient contact limited to 2 rounds
- Need to check if patient on other studies
- Roll out to institution in March or April
- No eRecord access? CTSI will fill that role
- Follow up with patients quickly- 2-3 business days
- Retract messages when study's recruitment period ends

New Research Study Opportunity Available

Updated Feb. 3: We're phoning our patients aged 65+ in randomized order to book COVID vaccine appointments; no need to call us. But supply levels allow only a few hundred spots each week out of 100,000 eligible patients, so consider also trying vaccine clinics run by the state or pharmacies.

Login: <https://mychart.urmc.rochester.edu/mychart/>

Hello Flicker,

Please log in to your MyChart account to view a new research study opportunity -- Find this in your menu under Research Studies.

If you have forgotten your login information, please use our [Recover MyChart Username](#) or [Password Reset](#) links to help retrieve this information.

Thank you for using MyChart!

Help keep yourself, your family and the community safe by tracking your health daily. Even if you feel well, doing this simple screening every day can help stop the spread of COVID-19 and let our region recover. [Visit ROCCOVID.org](https://rocco.org) now.

Patient View within MyChart

The screenshot displays the MyChart patient view interface. On the left is a navigation menu with a search bar and categories: Insurance (Insurance Summary, Coverage Details, Wallet Card), Sharing (Share My Record, Share Everywhere, Link My Accounts, Lucy, Linked Apps and Devices, Access for Friends & Family), and Resources (Search Medical Library, Research Studies). The main content area features a top navigation bar with the University of Rochester MyChart logo and a 'Log out' button. Below the header, there are several notification cards: a 'Welcome!' message from UR Medicine with a 'View Message' button; a 'Share Everywhere' notification with 'Learn More' and 'Dismiss' buttons; a 'Save time while you save paper! Sign up for paperless billing.' notification with a 'Sign Up' button; a 'Flu Shot is overdue.' notification with a 'View Details' button; a notification about seeing information from multiple organizations with an 'Explore' button; and a 'You might be a good fit for a research study.' notification with a 'View Study' button.

Research Studies

Research is a way to discover new information or to answer questions about how to live healthier lives, how to better treat conditions or diseases, or how we learn, develop, behave and function to help society. Some research is also referred to as 'clinical trials' or 'health research.' These studies test drugs, medical devices, vaccines or other treatments that may affect a person's health or well-being.

Every study is a partnership between the people in our community who take part and the researchers at UR Medicine. There are several reasons why people choose to take part in research, most take part to help themselves or others. It's important to know that you may not benefit from taking part in research. In fact, with a lot of research, you will not receive any benefit.

MyChart now offers the opportunity to be notified about research studies you may be eligible for. If you are interested in receiving these messages, click "OK to Contact" and then you can create a profile to select areas of research you are interested in. **If you do not want to receive these messages, you must indicate below by clicking "Do Not Contact."** If you do not make a selection, we will assume that you are willing to be contacted. Your choice will not affect your use of MyChart, communication from your clinical team(s) or your healthcare at UR Medicine.

If you have questions about taking part in research, email ResearchHelp@urmc.rochester.edu or [click here to learn more](#) about other research opportunities, which includes a list of studies enrolling right now, and you can sign up to be contacted about research studies outside of MyChart by either email, phone, or letters. You can also learn more about research here: [Participating in Research at the UR](#).

[Participation Preferences](#) ^

May we contact you about opportunities to participate in research studies? **If no choice is made**, we will assume that you are willing to be contacted for research studies through MyChart. You can always change your contact preference in the future.

You can choose how to be contacted in [Notifications](#).

Update your profile to let us know the types of research you may be interested in.

Participation Preferences

Your preferences will help us let you know about research opportunities that might interest you.

- **OK to Contact** - You are willing to be notified through MyChart about a research study that might be a fit for you.
- **Do Not Contact** - You are not willing to be notified through MyChart about a research study. You may still be contacted directly through your provider about a study either through MyChart or through other types of communication such as letters and phone calls.

If no choice is made: We will assume that you are willing to be contacted for research studies through MyChart. You can always change your contact preference in the future. Visit the Research Studies page.

Research Preference Profile - Optional

Research Preference Profile

Would you consider participating in research studies as a healthy volunteer?

Many studies also need healthy volunteers for comparison purposes, so you don't necessarily have to have a condition to help researchers.

Yes No

Which areas of research would you be interested in?

You may receive messages about other areas of research.

Select all that apply.

Allergies & Immune System	Blood, Heart, & Circulation	Bones, Joints, & Muscles	Brain & Nervous System	Cancer	
Child Health	Diabetes	Digestive System & Liver	Drug/Alcohol/Substance Dependence	Ears, Nose, & Throat	
Endocrine System	Eyes & Vision	Food, Nutrition, & Weight	Genetics	Immune System	Infectious Diseases
Kidney & Urinary System	Lungs & Breathing	Mental/Behavioral Health	Mouth & Teeth	Newborn	Pain Management
Pregnancy & Neonatal	Reproductive & Sexual Health	Skin, Hair, & Nails	Sleep Disorders	Transplant	Wellness & Lifestyle

- **Available Studies** - New study opportunities
- **Active Studies** - Studies in which you are currently enrolled. Note, this list may not include all research studies you participate in, but only those offered to you through MyChart. You may also be enrolled in research studies which were offered to you through other modes of communication such as email, phone or letters.

Patients can see their available studies (Recruitment Requests sent through MyChart), Active Studies and Non-Active studies if available. Studies include only those that the patient is enrolled in in eRecord.
