

AUTISM RESEARCH

KIDS & ADULTS WITH ASD NEEDED FOR PAID STUDY!

ELIGIBILITY

diagnosed with Autism Spectrum Disorder (ASD)
 between 8 - 30 years old
 able to walk independently without mobility aid (i.e. crutches)
 under no influence of alcohol or drugs
 normal or correct-to-normal vision

PURPOSE OF STUDY

Understand how movement influences
 brain function in children & young
 adults with and without ASD using
 electroencephalography (EEG), and
 'MoBI' motion tracking

DETAILS

2 Study visits - We will record
 EEG and infrared motion capture.
 You will complete surveys and
 assessments

PAYMENT

Participants will be paid \$18 an hour!
 Parents/ Legal Guardians
 accompanying children will be paid an
 additional \$20 flat payment
