

MULTIDISCIPLINARY SPECIAL NEEDS AND COMPLEX DISEASES CLINICS

1.

iPADS

Enhances and facilitates communication with patients with special needs. iPads will utilize apps designed to help staff communicate with patients with autism and those who are verbally impaired. The technology will help oral health providers learn why the patient arrived, their pain levels and communication preferences.

\$600 (7 Needed)

PATIENT CARE

2.

Art

ART WORK FOR THE NEW CLINICS

Help us to purchase new art work to enhance the appearance of the clinic and create a warm and welcoming environment.

\$50 donation increments

3.

PARKING VOUCHERS

Allows department to help subsidize costs for parking for patients that can't afford parking fees at the medical center. Can be purchased/donated in multiples of 25 vouchers.

25 patient parking vouchers = \$100

50 patient parking vouchers = \$200

PATIENT CARE

OFFICE OF QUALITY IMPROVEMENT

1.

AXIUM INVENTORY MODULE / SUPPORT

The AxiUm Inventory Module is an add on module for our existing electronic dental record. This is necessary to automate the inventory process for both patient care supplies as well as tissue and implant use. The benefits will be seen in eliminated waste from loss of supplies, better inventory control and FDA recall for any implanted item/materials. Also needed is Annual Support for each module: \$5000.

\$38,000 (2 Needed)

PATIENT CARE

2.

INFRA RED TRANS-ILLUMINATIONAL DEVICE

The Infra red camera is used in the oral cavity to detect caries and cracks eliminating the need for radiographic images thereby decreasing radiation exposure to patients. It is a diagnostic tool which can be used on all patient types and especially useful in teledentistry clinics.

\$8,000 (40 Needed)
