3.

P FORMLABS FORM 2 3D PRINTER

P It prints by firing an ultraviolet (UV) laser into a thin layer of liquid resin between the print head and the bottom of the print tray. Once hit by the UV light, the resin solidifies. A new print process featuring a sliding peel mechanism, wiper and heated resin tank facilitates printing large, solid parts with intricate details

4.

RENFERT SANDBLASTER BASIC QUATTRO

Professional, comfortable sandblasting unit with 2 to 4 tanks. Provides:

- Precision & processing safety for every procedure.
- Controlled and exact sandblasting of finely detailed objects thanks to integrated quick stop technology.
- Precise and reliable processing at best possible cost effectiveness with the special mixing chamber technology.
- Quick and safe operation due to exact pressure adjustment and control of actual pressure for every tank.

5.

W&H IMPLANT MOTOR

The new completely redesigned Implantmed by W&H offers full functionality for most maxillofacial procedures. Intuitive interface on the color glass touch screen, USB documentation, multi-user support, and custom drilling protocols are now standard on every unit. New Implantmed is upgradable at any time with LED+ light, wireless foot control, or W&H Osstell ISQ module for measuring implant stability.

7.

ROLAND MILLING UNIT

The DWX-52DC offers dental laboratories the opportunity to be more productive in their current milling environment. With the addition of an automatic disc changer and its ability to hold up to 6 adapters, laboratories now can enjoy the privilege of running jobs continuously and unattended, throughout the day, night or over the weekend.

\$40,000

EDUCATION & EQUIPMENT

8.

CAD CAM SCANNER

It will enable the design of a wide range of prosthetic restorations followed by direct transfer into the milling solution in-lab.

\$40,000

EDUCATION & EQUIPMENT

9.

IVOBASE INJECTOR

IvoBase Injector permits a fully automated, controlled injection and polymerization procedure of special PMMA resins which are coordinated with the system. The chemical shrinkage of the resin is entirely compensated during polymerization - thanks to the patented temperature control in the flask and the heater. This enables the fabrication of denture bases featuring high accuracy of fit and precision. The injector has been especially developed for the IvoBase material and permits excellent restorations. The IvoBase Injector can also be used for the tried-and-tested SR Ivocap material.

\$12,000

EDUCATION & EQUIPMENT

10.

3SHAPE E SCANNER E3

The affordable E scanners make advanced CAD/CAM accessible to dental labs of all sizes while raising the bar for entry-level solutions.

\$10,000
