CLASS OF 1995:
LOOKING TO THE FUTURE

O

n Friday, June

16, Eastman Dental Center's Class of 1995 celebrated with family and friends at their graduation ceremony. Twenty-nine residents were in the graduating class this year.

On the agenda: presentation of awards and fellowships, the commencement address, and finally, the granting of certificates to residents in general dentistry, orthodontics, pediatric dentistry, periodontology, prosthodontics, and temporomandibular joint disorders.

EDC's commencement address put the spotlight on an Eastman success story. Dr. Margery Forgay, professor emeritus of the University of Manitoba, presented the commencement address. She is an alumna of Eastman Dental Center's former School of Dental Hygiene, Class of 1952.

Professor Forgay, a leader in dental hygiene education for more than 30 years, delivered an address on the future of dental hygiene education from a sociologic, economic and political perspective. She is the former director of the School of Dental Hygiene at Dalhousie University, having retired in 1994. She also served as director of the School of Dental Hygiene at the University of Manitoba, which she founded in 1963. She was awarded an honorary doctor of laws degree from Dalhousie University in Halifax, Nova Scotia in 1994.

Commencement Speaker Margery Forgay, professor emeritus of the University of Manitoba and an alumna of the Center's former School of Dental Hygiene (Class of 1952).

Forgay began her address by saying, "I have made my career in the field of dental hygiene. So it will not likely surprise you to learn that that is what I will speak about today, and especially of the forces which influence it and its prospects."

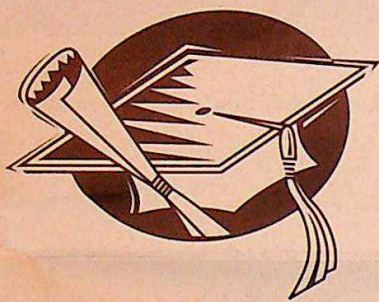

"It was in Canada in 1982 that the first conference on dental hygiene research took place; we have developed clinical practice standards which were generated and content validated by

practicing clinicians; we have a code of ethics judged by ethicists to be one of the best for a Canadian health profession; our national certification process is very recent, but developed and controlled by dental hygienists rather than dentists; and perhaps most significant of all, more than 90% of Canadian hygienists live in jurisdictions where dental hygiene is a self-regulating profession."

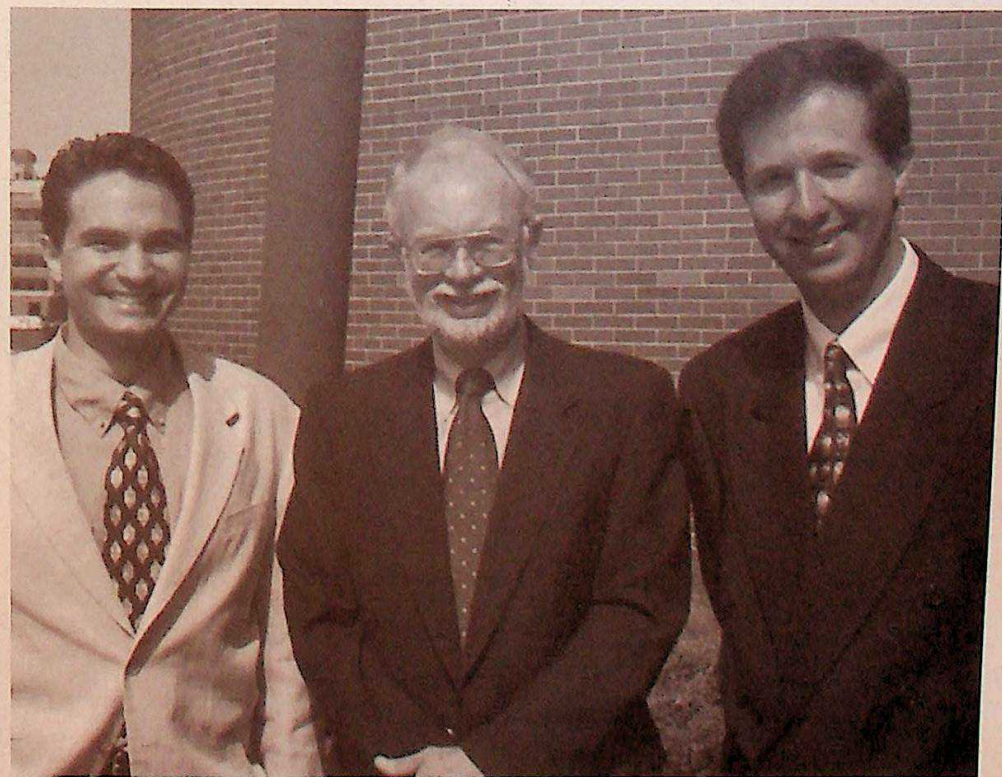

Dr. Forgay talked about factors that have led to changes for the profession. These include the impact of demographic changes in both the U.S. and Canada, "leading to older populations. In Canada, we anticipate that in 20 years nearly 20% of the population will be over age 65. This is changing the nature of the demands of health care."

"Epidemiology of dental diseases will also be very influential in the future of dental hygiene. We know that seniors will not only form a large part of our population, but that they will also be mostly dentate. The care they will need will be largely that of prevention and

(continued on page 2)

"My own hope is not that dental hygiene will become independent, but that dentistry and dental hygiene will become interdependent, each recognizing and respecting the value and roles of the other, and working together to build a better oral health care system," states speaker Margery Forgay.

Research fellowship winners, Dr. Stephanos Kyrkanides and Dr. Antonio Moretti pictured with **Dr. Ronald J. Billings**, director of Eastman Dental Center.

CLASS OF 1995: LOOKING TO THE FUTURE

(continued from page 1)

"In the final analysis, we hope that we have given you more than a certificate. We hope that your education has opened a window to your future. And that you leave us with a sense of the Eastman tradition."

Dr. Wilfred A. Springer
President of the Center's
Board of Trustees

maintenance — the domain of dental hygiene. It is also likely that the trend of caries reduction in children will continue. Before we become too elated about this, however, we should look at data for different segments of the population: in Canada, caries rates continue to be very high among children of new immigrants, indigenous people, inner-city residents, and other impoverished groups. There is a tremendous amount of work to be done in the prevention of caries in these groups, and this will likely only be accomplished through community dental programs."

Other factors identified by Dr. Forgay include economics and the need to contain or reduce the costs of health care as well as how it relates to who gets the diseases and who gets treatment. "We know that more affluent groups not only get more and better dental care, they have less disease in the first place. Yet oral care continues to be disregarded as just another commodity," said Forgay. Other influences identified by Forgay are consumer power and the increasing public representation on professional regulatory bodies.

Forgay also identified political influences and factors which are sociological in nature: things like gender, equity and power relationships. "Of special concern are the many citizens of Canada and the United States who have no adequate access to even basic services. Dental hygienists in both countries want to have a part in changing that." She goes on to say, "My own hope is not that dental hygiene will become independent, but that dentistry and

dental hygiene will become interdependent, each recognizing and respecting the value and roles of the other, and working together to build a better oral health care system."

In conclusion, Forgay said, "I believe that the dental hygiene profession in both Canada and the United States is well positioned to assume a more influential role in oral health care. It is an exciting and challenging time for the profession."

During the commencement ceremony, Dr. Ronald J. Billings, director of Eastman Dental Center, presented the following awards:

Sean Meitner, D.D.S., M.S., of the periodontology program received the Award for Excellence in Teaching by Part-time Faculty. Dr. Meitner also maintains a private practice in Pittsford. An EDC alumnus who received his certificate in periodontology in 1975, Dr. Meitner has a long affiliation with Eastman Dental Center and the University of Rochester. He has worked as a part-time faculty member in the periodontology program for the past three years. He initiated, and supervises, the surgical component of the implant program within the periodontology program.

"Dr. Meitner has almost single-handedly initiated an outstanding program that has matured rapidly and which provides a valuable educational experience for our graduate residents," said Dr. Jack G. Caton, Jr., professor and director of the periodontology program and Associate Director for Educational Programs.

Two residents received research fellowships. The *Basil G. Bibby Research Fellowship*

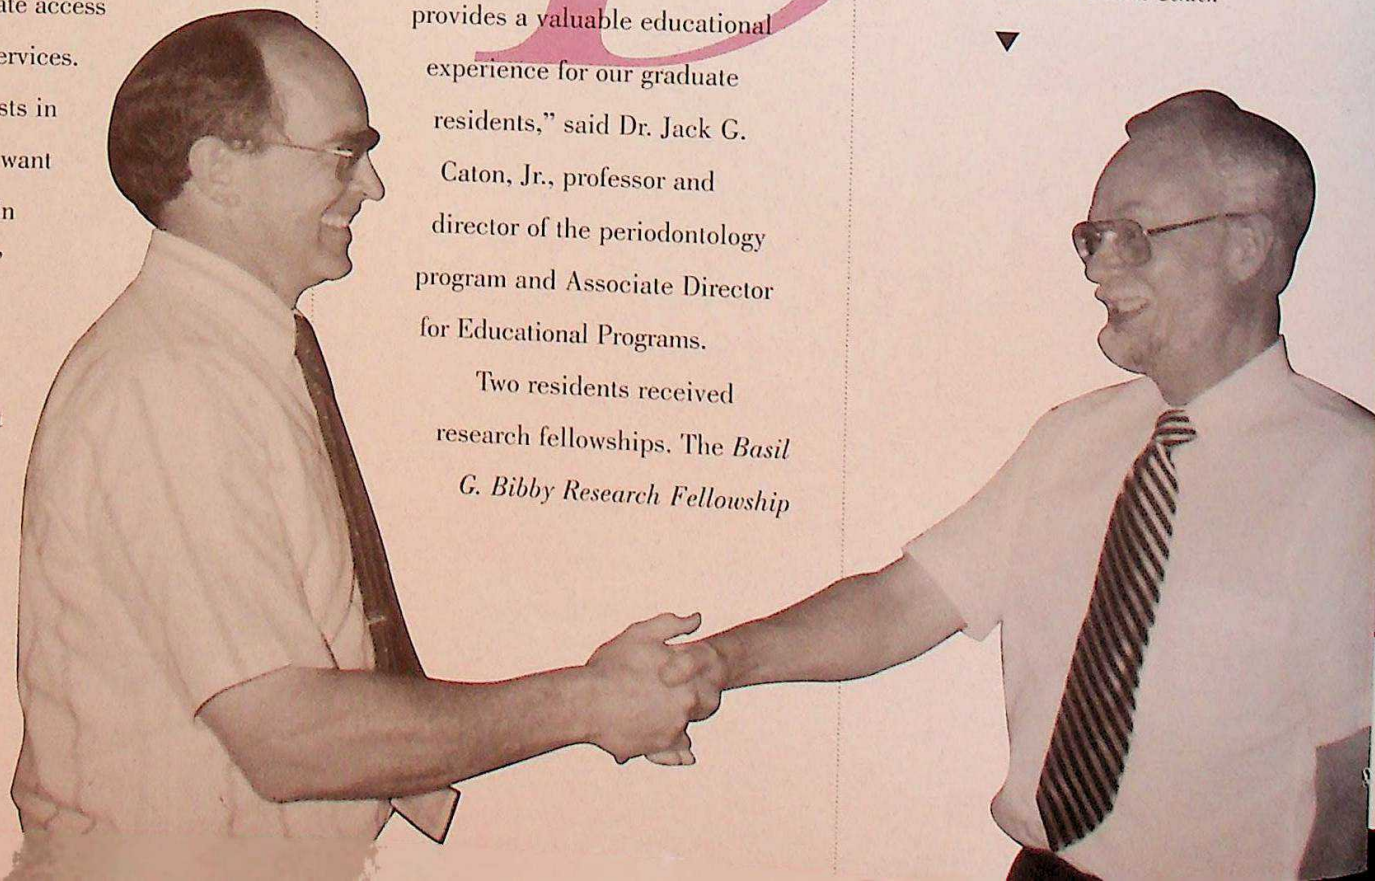

is awarded by the Center when a resident's scholarship in research is particularly meritorious. Dr. Stephanos Kyrkanides was granted the fellowship for his project, "Trigeminal Nuclear Complex of the New Zealand White Rabbit: Anatomical & Immunohistochemical Studies."

A student research fellowship was awarded to Dr. Antonio Moretti for his project, "Characterization of Periodontal Fibroblasts Subpopulations."

The Rochester Section of the American Association for Dental Research presented two awards to Eastman Dental Center residents for their presentations at the annual meeting in February 1995. The *Basil G. Bibby Award* for outstanding scientific merit by a non-degree student was presented to Dr. Rose Wadenya. Dr. Antonio Moretti received the *Michael G. Buonocore Award* for outstanding scientific merit for a M.S. or Ph.D. student.

Dr. Wilfred A. Springer, president of the Center's Board of Trustees, closed the ceremony by asking residents to take a moment to reflect upon their accomplishments, adding, "in the final analysis, we hope that we have given you more than a certificate. We hope that your education has opened a window to your future. And that you leave us with a sense of the Eastman tradition."

r. Sean Meitner, recipient of the Award for Excellence in Teaching by Part-time Faculty, is congratulated by Dr. Ronald J. Billings, director of Eastman Dental Center.

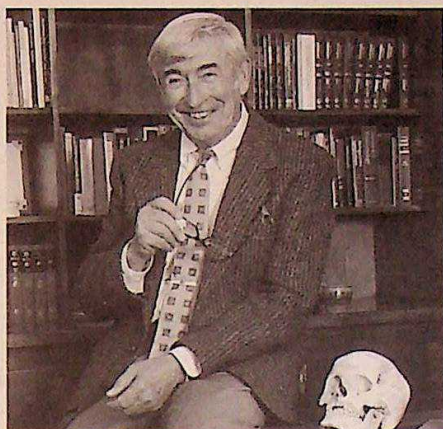

PROGRAM DIRECTOR NAMED RECIPIENT OF PRESTIGIOUS AWARD

D

r. J. Daniel

Subtelny, program director of Eastman Dental Center's orthodontics program, has been named a co-recipient of the 1996 Albert H. Ketcham Memorial Award; the highest award presented by the American Board of Orthodontics. This prestigious award is also being bestowed posthumously on Dr. Samuel Pruzansky, a distinguished craniofacial researcher who was affiliated with the University of Illinois. The award will be presented to Dr. Subtelny during the opening ceremony of the 96th session of the American Association of Orthodontists (AAO) on May 12, 1996 in Denver, Colorado.

J. Daniel Subtelny, D.D.S., M.S., program director of Eastman Dental Center's orthodontics program.

One of the pioneers in orthodontics, Dr. Albert H. Ketcham was a trailblazer who made significant contributions to the science of orthodontics. To commemorate his achievements and to serve as an inspiration to the advancement of orthodontics, the Albert H. Ketcham Award was established in 1936 by the American Board of Orthodontics in collaboration with The American Association of Orthodontists. The award is given annually to

an orthodontist or other individual who has made a notable contribution to the science and art of orthodontics.

Dr. Subtelny has served as professor and director of the orthodontics program since 1956. He has held appointments in the clinical dentistry and dental research departments of the University of Rochester since 1972. He has made a significant impact as a teacher and mentor on more than 200 residents during his nearly 40 years at Eastman Dental Center.

"We are very proud that Dr. Subtelny will receive this honor," said Dr. Ronald J. Billings, director of Eastman Dental Center. "He has led a very distinguished career and we look forward to celebrating this achievement next May."

"We are very proud that Dr. Subtelny will receive this honor," said Dr. Ronald J. Billings, director of Eastman Dental Center. "He has led a very distinguished career and we look forward to celebrating this achievement next May."

ANNUAL CAMPAIGN KICKS OFF

R

eady, set, go!

We're off and running with the 1995 annual campaign, which is on a new calendar this year. We kicked off the campaign in June, following the April release of our annual report. For those of you who have already responded to our June letter, thanks for the support! For those of you considering a donation, we hope to hear from you soon.

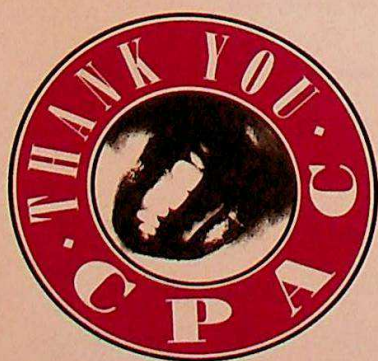

CPAC, INC. MAKES VALUABLE DONATION

A

lmost five years ago, CPAC, Inc. generously donated an Allied AP201™ x-ray film processor and daylight loader to Eastman Dental Center. The general dentistry program estimated the equipment's work load at 7-10 full-mouth series, 8-10 sets of bitewings, and 25-30 individual films per day, six days per week, 50 weeks per year for five years.

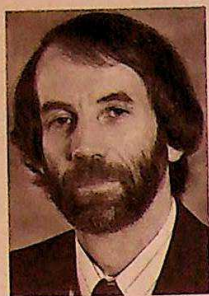

This remarkable record of service speaks volumes for the durability and quality of CPAC, Inc.'s x-ray film processors.

Recently Dr. Hans Malmstrom, program director of the general dentistry program, informed the quality assurance committee that it was time to replace the unit. Dr. Ronald J. Billings, director of Eastman Dental Center sent a letter to CPAC, Inc. asking them if they would donate a second x-ray film processor to the Center. The company responded within days, offering to donate a like-new rebuilt x-ray film processor and to rebuild the current unit. "CPAC, Inc. has made an outstanding donation to the Center," said Dr. Billings. "Their x-ray film processor is of the highest quality, and we thank them for their contribution."

"CPAC, Inc. has made an outstanding donation to the Center," said Dr. Billings. "Their x-ray film processor is of the highest quality, and we thank them for their contribution."

INTERVIEW SPOTLIGHT:
DR. JOHN FEATHERSTONE

John D.B. Featherstone, Ph.D., former chair and professor of Oral Sciences.

COMMEMORATING 15
YEARS OF SERVICE

Since June of 1980, Dr. John Featherstone has provided leadership to the Department of Oral Sciences. His career has been marked by innovation, quality, and dedication. Dr. Featherstone has been the recipient of numerous foundation, federal and commercial grants and contracts as a principal investigator, co-principal investigator, or major participant. He has pioneered and broken new ground in caries research in the grandest tradition of Eastman Dental Center scientists. Particular achievements include: field advancing work in the mechanisms of enamel de- and re-mineralization; mechanisms of fluoride effects in preventing or reversing dental caries; and most recently on the effects of lasers on enamel and dentin. He has contributed significantly to Eastman Dental Center's educational programs as a role model for Eastman Dental Center and University of Rochester students. Greater than 75% of his students have pursued careers in science and/or academia.

W

hat research accomplishments are you especially proud of?

There are several things that the Department of Oral Sciences contributed to. One of the major ones is in the elucidation of the mechanism of action of fluorides in the prevention, control and remineralization of caries lesions. My lab made major contributions to a new understanding of caries prevention.

In the early 1980s, there was a revolution in the understanding of how fluoride works. We played a big role. Eventually our research helped change the thinking of the American Dental Association, and as a result, many companies altered the way they sell and advertise products.

Another area where we made a major contribution is understanding the reactivity of carbonated hydroxyapatite, the mineral in our teeth and bones.

Our laboratory is one of the few in the world that pushed for years that properties of tooth mineral are affected greatly by carbonate inclusion in the structure.

Q: What are some of your best memories here at EDC?

A: I've got a lot of good memories. One of the nicest things about the Center is the international multicultural environment. My children from my first marriage grew up in a house where there were always people from other parts of the world who spoke different languages.

I have had a stream of visiting scientists over the past fifteen years from all over the world, including Israel, Sweden, China, and Japan. It has been a policy of the Center to have a multi-national residency program.

Q: What events were especially significant for you?

A: That's a good question. There are many events. One of the significant ones would be Dr. Basil Bibby's 80th birthday celebration. I chaired the organizing committee and we had a lot of fun.

Another highlight was the 75th anniversary of the Dental Center. I chaired the organizing committee for the scientific program. We had an international cast of players, almost all of them were alumni of Eastman Dental Center.

Q: Who at Eastman Dental Center made a special impact on you?

A: Several people at the Dental Center made a personal impact on me. I will name just a few. Dr. Basil Bibby was one of those people.

He was still in the department when I became department chair. He became responsible to me, which was a "trip" in itself. I remember having some very lengthy scientific and theoretical discussions with Dr. Bibby about this, that and the other thing, and getting into the whole "what is life all about?"

I can remember when he finally retired. At that point, he had been a member of my department and he was supposed to abide by the rules. One day, he came in to see me. Now, he had already retired once under my leadership, but this was to be the final time.

He walked into my office, took his hearing aide out, and announced that he had something important to say.

It was obvious that he wasn't interested in my reply. He said that he was retiring, and that this time, he wouldn't be back. Of course, we kept a desk and a chair for him. Eventually he came back and spent a day a week here for a few more years.

There are other people who had a big influence on me. Dr. Helmut Zander, who had stepped down as head of periodontology, was another person who influenced me. He had a reputation as being gruff and demanding, but we became personal friends right off the bat.

Dr. Stanley Handelman, former chair of the Center's Department of General Dentistry was important to me. We had a lot to do with each other because many of his general dentistry residents came through my department. We spent a lot of time working together on redesigning the program. I can't take much credit for that, but I played a small part in the redesign of the general dentistry program which had more and more research options in it. Stan also had a big effect on my kids and that was very important.

One other person is Bill McHugh, who was director during most of my years here.

Q: You are going to the University of California at San Francisco. What will you do there?

A: That's a good question. In San Francisco there's so much to do, I don't know if I'll have time to work. My position there will be as professor in the department of restorative dentistry at the University of California at San Francisco.

My primary responsibilities will be teaching and research. I'll have the responsibility of re-establishing the cariology program out there in terms of teaching. I will revamp what's taught in the caries area for the pre-doctoral program and I will establish graduate courses in cariology.

Q: Some people who read this article may want an update on your personal life.

A: Pam Den Besten, who is also going to San Francisco, will chair the division of pediatric dentistry at the University of California at San Francisco. We were married in September of 1994 and she has two children ages 7 and 10.

(continued on page 8)

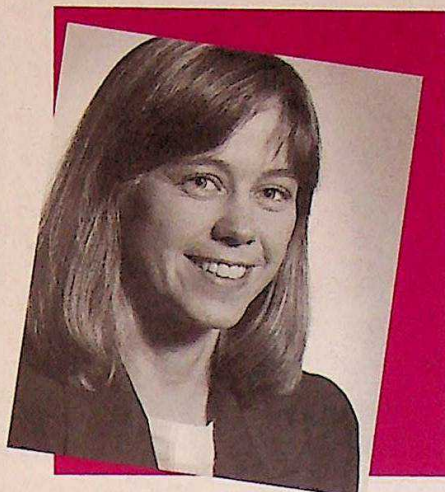

A LEGACY FOR THE PEDIATRIC PROGRAM

“S

he is a superb

recruiter and administrator who has shaped the pediatric department in a very positive way,” said Dr. Robert Berkowitz, who was recruited in 1992 by Den Besten for the position of program director of the pediatric dentistry program.

Three years ago, Dr. Pamela Den Besten came from Forsyth Dental Center to serve as chair of the pediatric department at Eastman Dental Center.

Pamela K. Den Besten,
*D.D.S., M.S., former chair and
associate professor of Pediatric Dentistry.*

Today the pediatric program is thriving. When asked about her accomplishments, Dr. Den Besten responded, “I have had the good fortune to work with talented and committed people who helped make me look good.”

Under Den Besten’s leadership and in large part, thanks to Dr. Berkowitz, the department has developed a Division of Pediatric Dentistry within the Departments of Clinical Dentistry and Pediatric Medicine at the Strong Memorial Hospital. This division has led to new opportunities for residents and provides a vital link between the pediatric program at the Center and hospital-based dentistry.

The appointment of Dr. David Muench to fill a joint position between the pediatric and orthodontics programs has helped foster collaboration between the two programs.

In her new role as chair of the Division of Pediatric Dentistry of the University of California at San Francisco, Dr. Den Besten will administer both the graduate and undergraduate pediatric programs, combining her administrative role with clinical practice and research.

Today the pediatric program is thriving. When asked about her accomplishments, Dr. Den Besten responded, “I have had the good fortune to work with talented and committed people who helped make me look good.”

A FAREWELL EVENT

T

here were hugs,

warm words, and more than 50 friends and colleagues at the farewell dinner party on May 31 for Drs. Featherstone and Den Besten.

Dr. Pamela Den Besten served as chair of the pediatric program from May 1992 to June 1995. “We are grateful to Pamela for her accomplishments on behalf of the Center’s pediatric program,” said Dr. Ronald J. Billings, director of Eastman Dental Center.

After presenting Pamela with a plaque in her honor, Dr. Billings paid tribute to Dr. John Featherstone, an Eastman Dental Center faculty member since June 1980. “His reputation for ground

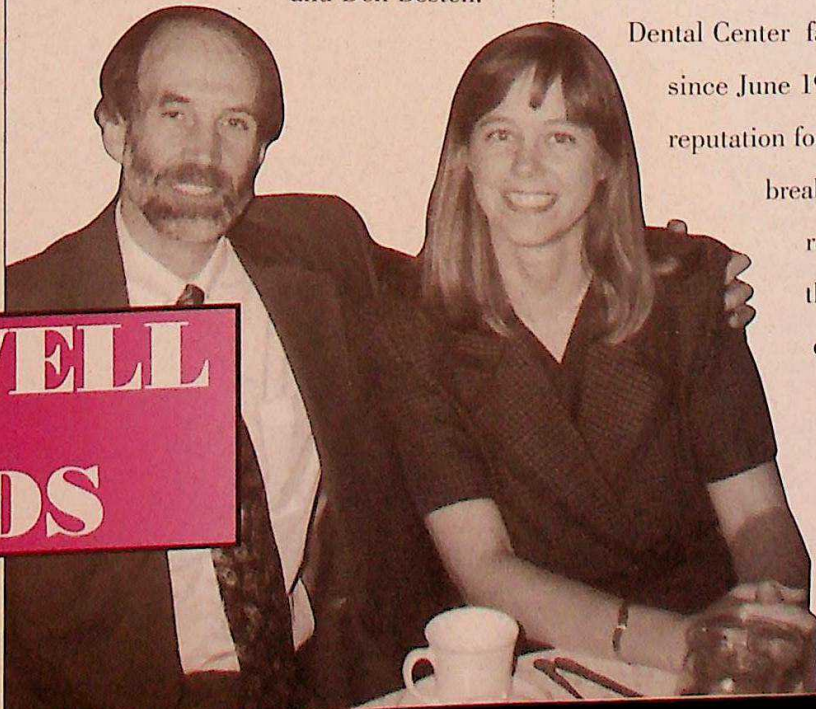

breaking research is respected throughout the international dental community,” said Dr. Billings.

Dr. Wilfred A. Springer, *president of the Board of Trustees, greets Sheila Mundorff-Shrestha, assistant professor in the research program.*

As of July 1995, Drs. Den Besten and Featherstone began working at the University of California at San Francisco. Dr. John Featherstone is professor in the Department of Restorative Dentistry and Dr. Pamela Den Besten is chair of the Division of Pediatric Dentistry.

John and Pamela smile for the camera during the farewell dinner.

**FAREWELL
GOOD
FRIENDS**

A

n apple for

the teacher...

On June 15, we honored an Eastman legend for his long career at Eastman Dental Center. After successfully talking

Dr. J. Edward Gilda out of retirement for years, Dr. J. Daniel Subtelny, orthodontics program director, finally lost the battle this spring. After 46 years at the

Center, Dr. Gilda announced his retirement and Eastman's orthodontic alumni joined together with friends and colleagues to send Dr. Gilda out with a bang!

The event included an afternoon lecture, presented by Dr. Subtelny, on "Early Orthodontic Treatment: Lessons from the Past, Hopes for the Future." This was followed by an impressive feast at the University of Rochester's faculty club. The highlight of the evening was Dr. Subtelny's presentation of a stunning Steuben glass apple for the teacher, a gift from those who attended the dinner and many other friends who could not be there. Dancing and celebration went on well into the night. Dr. Subtelny proudly commented, "We taught our residents more than just orthodontics. Thanks to us, they know how to party!"

A new beginning...

All of the speakers at the *First Annual General Dentistry Conference and Alumni Reunion*, held in honor of Dr. Stanley L. Handelman, former general dentistry department chair, were graduates of Eastman's Advanced Education in General Dentistry Program. "This was a thrill for me," said Dr. Handelman, "The quality of their presentations gave me a great deal of personal satisfaction."

Dr. Stanley L. Handelman, former chair of the Department of General Dentistry.

Forty-eight alumni attended the conference, and Dr. Handelman received many letters, faxes and phone calls from well-wishers who were unable to attend. "One advantage of making this an annual conference is that our alumni

will have other opportunities to attend in the future," said Dr. Handelman.

More than 120 people attended the dinner where long time friend and colleague, Dr. Bejan Iranpour, chief of The Genesee Hospital's Department of Dentistry, gave a personal tribute honoring Dr. Handelman.

Another highlight of the two-day event was a picnic, hosted by Dr. Handelman and his wife Ruth, at their new home on Canandaigua Lake.

Continuing the tradition...

Local dentists joined prosthodontic alumni, faculty, staff and residents for the *17th Annual Allen A. Brewer Conference*. This year's topic, "Diagnosis and Treatment of the Worn Dentition," was presented by Thomas Abrahamsen, D.D.S., M.S. Dr. Jim Soltys, alumnus and faculty member, hosted this year's picnic at his home. "I look forward to this week every year," said Dr. Gerald N. Graser, prosthodontic program director. "It's a great opportunity to catch up with all of my former residents."

Mark your calendar...

Pediatric Dentistry Conference/Dentistry for the Disabled Patient: 20 Years of Experience on October 27-28, 1995

This year's pediatric dentistry conference is being held in conjunction with a one-day conference that will focus on dental care and treatment for the developmentally disabled patient. There is no additional fee to attend both events. The pediatric dentistry conference on October 28 will feature two speakers. Dr. Richard Kreipe, chief of the University of Rochester's Division of Adolescent Medicine, will present a morning session on adolescent medicine. The afternoon lecture, "Dental Aspects of Child Abuse" will be presented by

Dr. Joseph Bernat, chief of Pediatric Dental Services of the Children's Hospital of Buffalo.

Dentistry for the Disabled Patient: 20 Years of Experience on October 27 will feature a variety of speakers, including the Center's Dr. Jorge Davila, as well as a variety of topics relating to dental care for developmentally disabled patients. People may attend individual conferences or the combined event.

Lingual Orthodontics Conference, November 3-5, 1995

Drs. Robert Baker, Jr. and James Wildman will present a three-day hands-on lingual orthodontic continuing education course. This course will offer an introduction to lingual procedures as well as a refresher for those who received training in the past.

"This was a thrill for me," said Dr. Handelman, "The quality of their presentations gave me a great deal of personal satisfaction."

Ethics on the roster?

Ethical considerations are rarely black and white, a lesson recently learned by Eastman residents. The Dental Ethics Conference, sponsored by The American College of Dentists, Eastman Dental Center (EDC) and the Pierre Fauchard Academy, brought together seasoned dental practitioners and residents from EDC, the Genesee Hospital, and University of Rochester for a debate on ethical issues.

The conference began with a brief introduction and then the group broke into focus groups comprised of five to eight people. Each group was presented with two ethical cases which they discussed to determine possible solutions. After reconvening for a final discussion, each group reported on their findings. "This format works because we stress awareness of the complexity of ethical issues for those who will work in the field of dentistry," said Clare Smith, New York State

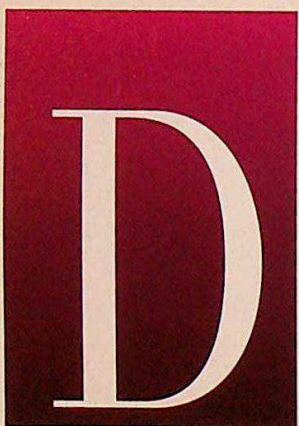

Orthodontics Program Director J. Daniel Subtelny, D.D.S., M.S., shares a moment with Cyril Meyerowitz, D.D.S., M.S., professor and chair of the Department of Clinical Dentistry of the University of Rochester's School of Medicine and Dentistry.

Chairman of the American College of Dentists and conference organizer.

Topics focused on relationships between dentists, patients, other dentists and third parties such as insurance companies. The session leader, Dr. Jeffrey Spike, assistant professor of the University of Rochester's Division of Medical Humanities, helped guide the discussion.

"We hope to provide this opportunity for all residents who pass through our programs," said Dr. Ronald J. Billings, director of Eastman Dental Center. "Dr. Fred Halik and Clare Smith did a great job organizing this conference. This was a valuable experience for our residents and an important element of their dental education."

FACULTY NOTES

r. Robert J. Berkowitz, program director of the Center's pediatric dentistry program served as a visiting professor at the School of Dental Medicine at the University of Puerto Rico from June 25 to July 2, 1995.

Dr. Jack G. Caton, Jr. (Class of 1973, periodontology) has been selected to receive a 1995 fellowship award from

The American Academy of Periodontology. The award will be presented at the Academy's 81st Annual Meeting on Wednesday, September 20. Dr. Caton serves as Eastman Dental Center's Associate Director for Educational Programs and Director of the Periodontology Program.

Dr. Jorge M. Davila, professor of pediatric dentistry at Eastman Dental Center, has been granted an honorary position at the University of Barcelona as adjunct professor of the Department of Pediatric Dentistry.

Dr. Gerald N. Graser, prosthodontics program director, was elected in May 1995 to serve for a one-year term as president elect of the Academy of Prosthodontics. The Academy is the oldest prosthodontic organization in the world, founded in 1918.

Dr. Domenick T. Zero, Eastman Dental Center's Associate Director for Research, was named president elect/councilor of the IADR Cariology Research Group. Dr. Zero will serve as president elect for one year before becoming president for a one year term.

SPREAD THE NEWS ABOUT ALUMNI

C

ongratulations to

the newly certified diplomates of The American Board of Orthodontics (March 1995). They are: Thomas L. Ratliff, Edward P. Snyder, and Hilton Wasilewsky.

Professor A.K. Kaul, Class of 1959, sends greetings to friends and colleagues. His address: Professor A.K. Kaul, B.D.S., M.D. S., F.I.C.D., F.I.O.A. S., Head, Department of Oral Surgery, D.A.V (Centenary) Dental College & Hospital, Yamuna-Nagar, Haryana-135001 INDIA.

We received a note from Brian Harvey with a return address of Australia. Brian, an EDC alumnus (Class of 1959), retired in 1994 after 34 years in periodontal practice. A warm "hello" to his fellow periodontal colleagues, especially John Pfeifer, Stan Hazen, Jorgen and Else Theilades, Kevin and Barry Gillings, and David dal Pra.

Dr. Hussein Salem, Orthodontics, Class of 1967 (M.S. degree in 1968) recently visited Eastman Dental Center and gave us his new address. You can write to him c/o of the Orthodontic Department, Dental School, Damascus University, Damascus, Syria.

INTERVIEW SPOTLIGHT

(continued from page 4)

My two children from my first marriage are Mark and Michelle. They met many alumni over the years. They both live in Salt Lake City.

Q: *Is there anything you want to add?*

A: I leave Eastman Dental Center feeling that it contributed a lot to my career. Certainly it gave me an opportunity to do a tremendous amount of research.

One of my really nice memories of EDC is the support within my department, really wonderful support.

I had the privilege of working with a large number of residents from around the world. I also worked with some very fine people in my department and at the University of Rochester. It has been a wonderful environment.

Alison Mathews Harding, Pediatric Dentistry (1988-90), continues to enjoy the challenges of academic life at Case Western Reserve University, School of Dentistry. She was recently invited to serve as a reviewer and abstract editor for the Journal of Pediatric Dentistry.
