

Jeremy Doak, MD

Clinical Associate Professor, Orthopaedics
University at Buffalo - Jacobs School of Medicine and Biomedical Sciences

As a pediatric orthopaedic surgeon, Dr. Doak's clinical expertise is the treatment of pediatric orthopaedic trauma and general pediatric orthopaedics. His aim is to ensure that all the children under his medical care are able to participate in a physically active lifestyle, because the benefits of a healthy musculoskeletal system translate into overall physical and emotional health. He is clinically active in hip preservation through arthroscopy and reconstruction/osteotomy. Dr. Doak has a special interest in spinal deformities and pediatric, idiopathic and neuromuscular scoliosis as well. He performs surgery at the Oishei Children's Hospital, and practices at the UBMD Orthopaedics & Sports Medicine clinics, on Harlem Rd. and in Orchard Park.
