David Paul, MD, MS

Assistant Professor, Department of Neurosurgery
University of Rochester Medical Center

Dr. David Paul is the Director of Brain and Spine Trauma and an Assistant Professor of Neurosurgery at the University of Rochester in Rochester, NY. He completed his undergraduate studies at Hope College in Holland, MI, and earned his medical degree from the University of Rochester, where he also obtained a Master's in Neurobiology and Anatomy. Dr. Paul's neurosurgical training includes residency and an enfolded CAST fellowship in neurocritical care at the University of Rochester Medical Center, followed by a fellowship in complex deformity spine surgery at the University of Pittsburgh Medical Center.

His translational research interests include using advanced neuroimaging modalities to better understand the trajectory of recovery in patients with traumatic brain injuries. Outside of his professional responsibilities, Dr. Paul is a devoted husband and father of two boys. He enjoys spending his free time engaging in sports, golfing, yardwork, and traveling with his family.
