

**Liz Rogers, RN**  
Clinical Nurse Leader in Emergency Department  
Rochester General Hospital

Liz Rogers has been in health care/emergency services for almost 30 years. She started her decontamination experience in the fire department. Liz always enjoys learning about hazmat and decontamination. Her new love about it is teaching it.

Liz's most recent certification is the first receiver train-the-trainer. She would love to eventually have every single nurse, tech, respiratory therapist, and provider trained in the emergency department.
