Lund Room  
3.3211

Light Snack Provided

**Keynote Presentation**  
Class of '62 Auditorium

***"Building and repairing the lung at single cell level"***

**Jeffrey, A. Whitsett, M.D**

Noon - 1 pm

Dr. Jeffrey A. Whitsett is the Kindervelt Professor of Pediatrics, and Co-Director of the Perinatal Institute and Chief for the Section of Neonatology, Perinatal and Pulmonary Biology at the Cincinnati Children's Hospital Medical Center. He is internationally recognized for discovering surfactant proteins B and C, and for his research on Cystic fibrosis, lung morphogenesis, and the regulation of genes controlling development and regeneration of the respiratory epithelium. He is a member of the National Academy of Medicine and has received numerous awards, including the Mary Ellen Avery Award from the Pediatric Academic Society and the Edward Livingston Trudeau Award from the American Thoracic Society.
