

MEDICINE *of* THE HIGHEST ORDER

**Director of Blood and Marrow Transplant &
Cellular Therapy Program**

The Hematology-Oncology Division at the University of Rochester is seeking M.D./Ph.D. or M.D. Associate or Full Professor applicants with a strong track record of clinical and/or basic research for this faculty position. As the region's first BMT and Cellular Therapies FACT&NMDP accredited program, we provide >200 treatments annually, including allogeneic, haploidentical, cord blood, and autologous transplant, as well as commercial and investigational CAR-T cell therapies. 30 years of experience, cutting-edge clinical & basic research, and extensive support services allow us to care for adult and pediatric patients and their families with compassion and expertise.

The University of Rochester Medical Center has a longstanding tradition in stem cell biology and therapies, and is the major site for comprehensive care, research, education, and community outreach in hematologic and oncologic disorders in central New York State. Our facility provides fully integrated inpatient and outpatient clinical and research space for stem cell biology and transplantation, a key aspect of the Wilmot Cancer Institute Strategic Plan.
