

32nd Annual Intensive Integrated Care and Medical Family Therapy

Medical Family Therapy Intensive Co-Directors:

Susan H. McDaniel, Ph.D
Dr. Laurie Sands
Distinguished Professor of
Families and Health

Tziporah Rosenberg, PhD, LMFT
Associate Chair of Education
Department of Psychiatry

An innovative, meaningful, an interdisciplinary training that blends clinical presentations, small group learning, and skill development is held for five days (Monday—Friday).

Primary Goal: To provide training for professionals interested in health care and mental health collaboration when working with patients and families dealing with illness, health concerns, and trauma.

Participants Outcomes:

- Develop individualized goals at the beginning of the intensive and discuss and assess their attainment during the final group discussion.
- Work in small groups convened by a core faculty whose focus will be the influence of family and personal experience in one's professional work. The groups will also provide context for case and systems consultation.
