Adenovirus Quantitative NAAT, Plasma: New Assay

Date: June 9th, 2022

Effective Date: June 15th, 2022

UR Medicine Labs will perform a new in-house nucleic acid amplification test (NAAT) for the quantitation of human adenovirus viral load in plasma.

Test name: Adenovirus Quantitative NAAT

Test code: ADEQ

Sample type: EDTA plasma

Quantitative range: 200 copies/mL to 200,000,000 copies/mL

Limit of quantitation: 200 copies/mL; adenovirus DNA detected below the limit of quantitation will be reported as ('Detected: <200 copies/mL')

Turn-around-time: 1 – 4 days

For questions or additional information, please contact Kelly DeLary, Clinical Virology Supervisor, Kelly_DeLary@URMC.Rochester.edu or Andrew Cameron, PhD.
