MEDICINE

September 23rd, 2022

Dear Physicians, Providers and Staff:

UR Medicine's Molecular Diagnostics Laboratory is experiencing operational delays resulting in longer than usual turn-around times for our Myeloid/CLL Next-generation sequencing (NGS) panel (MCMP). The expected turn-around time for non-urgent cases is now 4-5 weeks. Some samples will be prioritized based upon medical need. Due to instrument and staffing limitations, it will likely take several weeks to work through our backlog of cases. We appreciate your patience.

From: Audrey Jajosky, MD, PhD
Associate Director of Molecular Diagnostics
