

Post-Vasectomy Semen Analysis: SMH ONLY

Date: January 13th, 2022

Effective Date: January 19th, 2022

As of January 19th, 2022, the Post-Vasectomy Semen Analysis: SMH ONLY panel will replace the Post-Vasectomy, Semen Analysis test at Strong Memorial Hospital. The Post-Vasectomy Semen Analysis: SMH ONLY panel will include the following components:

- Volume
- Liquefaction
- Viscosity
- Concentration (percent and total) *
- Motility (percent and total) *
- Progression, non-progression, and non-motile*

*components will not be included if insufficient quantities of sperm are present

The Post-Vasectomy Semen Analysis: SMH ONLY panel will be exclusively available when testing is performed at the Hematology and Chemistry Laboratory at Strong Memorial Hospital. Patients must schedule an appointment at the SMH Outpatient Lab to receive this panel. Patients who present at any other UR Affiliate will receive the current Post-Vasectomy, Semen Analysis test.

This panel must be prescheduled by calling (585) 758-0510, option 3. Appointments are available Tuesdays and Thursdays, 7am – 1pm, excluding holidays. No walk-ins are allowed.

If you have any questions please contact Mary Johnson, Chief Supervisor for Hematology and Chemistry Laboratories at Strong Memorial Hospital, at (585) 275-2435 or MaryG_Johnson@urmc.rochester.edu, or Dr. Chohan at any of the methods listed above.
