

## Complete (comprehensive) Semen Analysis Panel: Change to Testing

Date: May 24, 2019

---

Effective Date: June 17, 2019

On June 17, 2019, the UR Medicine Andrology Lab at Strong Memorial Hospital will remove sperm viability testing on the Complete (comprehensive) Semen Analysis panel.

The complete (comprehensive) semen analysis will include: total sperm count, motility and morphology. Measurement of sperm viability will be discontinued because it has limited value in routine semen analysis.

Please contact Dr. Breen at 585-487-3444 with any questions.
