➤ **URMC Policy Change Regarding Ordering of Send-Out Tests**

Effective February 1, 2011, new send-out test ordering policy implemented.
For details, please select this link: [Send-Out Test Policy Details\(memo\)](#)

➤ **HIV Testing Practices in New York State - Update**

- Health care providers do not need to certify that informed consent has been obtained before ordering HIV testing by a laboratory or other facility
- Separate requisitions are no longer required

➤ **eRecord & ePartner are Coming Soon in 2011** [eRecord For Community Providers](#)

- [eRecord](#) is the name of the integrated electronic health record (EHR) being introduced at Strong Memorial and Highland Hospitals in 2011. The new system will serve both hospitals' inpatient areas, emergency departments, and outpatient areas.
- [ePartner](#) provides full access to the patient chart (i.e., lab results, discharge notes, images), but you will not be able to contribute to the chart in any way.
- eRecord & ePartner will be replacing CIS.
- For information on levels of access, training, and eRecord click this link: [About eRecord](#)
