## Hemoglobin Electrophoresis: Consent Required

Date: January 31, 2018

---

In the coming weeks, Hemoglobin Electrophoresis will require patient consent as it involves testing genetic material.

When ordering the test, providers will need to document in the electronic order or on the paper requisition if they want the additional testing and attest to consenting the patient.

Testing will not be performed without documentation of consent.

To obtain the consent form, please click on the link to our test menu:

<https://www.testmenu.com/rochester/Tests/67946>

From: Richard Burack, MD, PhD

Professor of Pathology and Laboratory Medicine

Director of Hematopathology Unit and Vice Chair for Clinical Operations

University of Rochester Medical Center
